PROFESSIONAL EXPERIENCE

Digital & AI Strategy Intern — Paris, France
Wabtec Corporation — *Feb. 2025 – Apr. 2025*

- Conducted gap analysis between existing AI capabilities and business requirements, translating insights into actionable AI feature recommendations
- Identified 15 high-impact AI use cases to improve efficiency, reduce costs, and accelerate decision-making
- Led strategic AI and GenAI analysis across internal operations and decision-support systems
- Collaborated with stakeholders to define an AI adoption roadmap, focusing on usability, scalability, and value

Logistics & Supply Chain Intern — Bengaluru, India
Sunshine Concrete Blocks — *Jun. 2023 – Apr. 2024*

- Optimized order fulfillment and inventory processes for 25+ monthly orders, reducing excess stock by 25% through data-driven inventory optimization
- Centralized operational data by migrating Excel-based order records into HubSpot CRM for real-time tracking and coordination

Digital Consultant & Team Leader — Paris, France
180DC HEC Paris — *Feb. 2023 – Jun. 2023*

- Analyzed client operational models with cross-functional teams, identifying user pain points and recommending digital optimization strategies
- Designed a financial and operational KPI dashboard using HubSpot, improving data-driven decision-making and enhancing executive visibility
- Delivered strategic, data-backed recommendations to stakeholders, translating insights into actionable outcomes

Project Engineer, Open-Source Program Office (OSPO) — Bengaluru, India
Wipro Ltd. — *Sep. 2020 – Jun. 2022*

- Designed, developed, and tested two web applications (PassForge and UMS), improving system efficiency
- Led a team of 3 in an Agile environment to deliver 50+ automation scripts for AWS and Azure deployments
- Analyzed user feedback to iterate on product features, ensuring alignment with customer expectations

Digital Marketing Intern — Bengaluru, India
GetMyUni — *Jan. 2020 – Feb. 2020*

- Managed lead acquisition, segmentation, and nurturing workflows using Salesforce CRM across multi-channel campaigns (Push, Email, Google Ads, SMS)
- Optimized 75+ landing pages based on user behavior analysis, improving conversion rates by 15%
- Automated lead processing with Python scripts, reducing processing time by 40%

PROJECTS

- **Master's thesis:** Blockchain-backed NFTs as digital proof of authenticity – developed a solution to enhance product transparency and combat counterfeiting
- **Ongoing:** No-code Retrieval-Augmented Generation (RAG) application using AstraDB for large language models
- **Viz-Aid:** Developed a shopping aid mobile application (Java, COCO dataset) at PESIT Bengaluru, addressing user needs for seamless shopping experiences
- **Crime Rate Analysis:** Conducted predictive analysis of crime rates in India using K-means and K-NN algorithms
